

HAVE YOU EVER WONDERED WHY THERE IS ONLY ONE “L” IN METALIC? You may have thought we had difficulty spelling. Or, that you were the only one that noticed. The truth is, our company origins are tied to the introduction in 1937 of the Michelin Metallic... the first truck tire with a steel casing!

Northern Metallic opened the first store in 1954 in Dawson Creek, BC – Mile 0 of the legendary Alaska Highway. Prior to a physical store, the business involved a small band of intrepid salesmen who travelled the newly constructed Alcan Highway peddling tires and supplies. The road was really bad... which meant the tire business was pretty good!

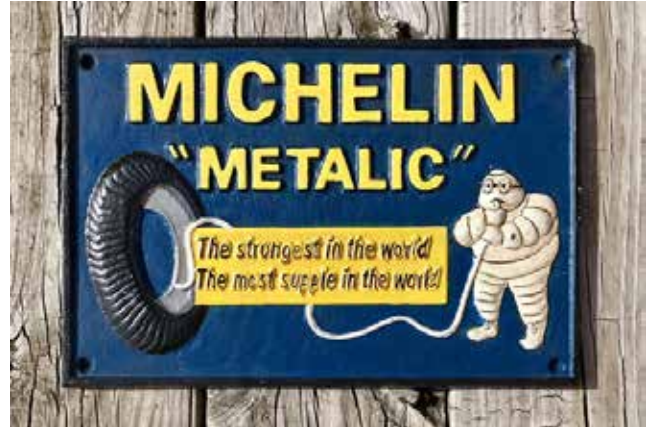

At that time, the Yukon was a hot bed of mining and transportation. On gravel roads the Michelin Metallic was a winner! The steel belted casing practically did away with flat tires. What a boon for the owners and drivers. The truckers on the Alcan loved it. Northern Freightways – owned by the Forsythe family – was one of Metallic’s best customers. With Michelin they passed everything on that dusty gravel road!

And it wasn’t long before all the haulers insisted on Michelin Metallic...

Michelin France wouldn’t let us use the name Northern Michelin but approved Northern Metallic... so we became Northern Metallic with the one l...

And, in keeping with the tradition of selling tires to drivers braving the Alaska Highway, Northern Metallic has built the business on identifying needs, providing solutions, and never losing sight of what matters most – the Customer!

2019 marks the 50th Anniversary of Northern Metallic in Alberta. Over the course of those 50 years Northern Metallic has been proud to be home to the industry’s finest people, a first class line up of products and services, and most of all... the best customer partners in the business. Now that is really something to celebrate!

WHAT WE OFFER

2.1GPM 1100PSI 1.5HP OR 3.0GPM 2500PSI 6.5HP HONDA
